

## CONTEXT

Innovating systematically is a competitive advantage that is hard to copy. ISO 56001 structures innovation as a managed, measurable process and eases access to R&D tax deductions and public grants.

## WHAT THE STANDARD REQUIRES

- An idea and opportunity management process
- A prioritized innovation project portfolio
- Strategic intelligence and environment scanning
- Management of external collaboration and IP
- Innovation return indicators and measurement
- A culture and leadership geared to innovate

## IMPLEMENTATION PHASES

- |   |                                                         |      |
|---|---------------------------------------------------------|------|
| 1 | Diagnosis<br>Innovation maturity and context analysis   | 3 wk |
| 2 | System design<br>Innovation processes and indicators    | 5 wk |
| 3 | Implementation<br>Portfolio, scanning and collaboration | 7 wk |
| 4 | Internal audit<br>Verification and corrections          | 2 wk |
| 5 | Certification<br>Support during the external audit      | 2 wk |

Estimated timeline: 6-8 months

## RETURN FOR YOUR ORGANIZATION

- ✓ Systematic, measurable and repeatable innovation
- ✓ Better access to R&D deductions and grants
- ✓ Sustainable competitive differentiation
- ✓ Attraction and retention of innovative talent

## FREQUENTLY ASKED QUESTIONS

Does it work for SMEs?

Yes; the system scales to the organization and especially helps SMEs structure their innovation.

Does it help with R&D tax deductions?

It eases the traceability and evidence of projects, the basis for deductions, though it doesn't replace them.

Is it certifiable?

Yes, 56001 is the certifiable version of the 5600x innovation family.
