

CONTEXT

Over a million organizations worldwide are ISO 9001 certified, making it the most widespread management standard. In Spain it is by far the most requested certification in public tenders and by large clients as a supplier-approval requirement.

WHAT THE STANDARD REQUIRES

- A process map with inputs, outputs and indicators
- Risk- and opportunity-based management
- Measurable quality objectives and their monitoring
- Control of documented information
- Internal audits and management review
- Nonconformity handling and continuous improvement

IMPLEMENTATION PHASES

- | | | |
|---|--|------|
| 1 | Diagnosis
GAP analysis against the standard and planning | 2 wk |
| 2 | Documentation design
Policy, processes, procedures and indicators | 4 wk |
| 3 | Implementation
Roll-out and evidence recording | 6 wk |
| 4 | Internal audit
Verification and corrective actions | 2 wk |
| 5 | Certification
Support during the external audit | 2 wk |

Estimated timeline: 4-6 months

RETURN FOR YOUR ORGANIZATION

- ✓ Access to tenders and large accounts requiring the certification
- ✓ Reduced rework and cost of poor quality
- ✓ Traceable processes that ease growth and delegation
- ✓ A foundation to integrate the rest of the ISO standards

FREQUENTLY ASKED QUESTIONS

Is it mandatory?

Not legally mandatory, but a de facto requirement in most tenders and supplier approvals.

How long is the certificate valid?

The certificate is valid for 3 years with annual surveillance audits.

Does it work for any sector?

Yes, it applies to any organization regardless of size or activity.
