

CONTEXT

The social-healthcare sector faces demanding quality requirements and administration audits. UNE 158101 certifies the care quality of residential and day-care centers, is increasingly required in public tenders and is implemented on the ISO 9001 structure.

WHAT THE STANDARD REQUIRES

- An admission process with integral resident assessment
- An individual care plan (ICP) for each person
- Coordination of healthcare and psychosocial care
- Management of hospitality and catering services
- Care quality and safety indicators
- Person-centered care and rights

IMPLEMENTATION PHASES

- | | | |
|---|--|------|
| 1 | Diagnosis
GAP analysis and care context | 3 wk |
| 2 | Documentation design
Care processes, ICP and indicators | 5 wk |
| 3 | Implementation
Roll-out and care records | 6 wk |
| 4 | Internal audit
Verification and corrections | 2 wk |
| 5 | Certification
Support during the external audit | 2 wk |

Estimated timeline: 6-8 months

RETURN FOR YOUR ORGANIZATION

- ✓ A decisive advantage in the sector's public tenders
- ✓ Certifiable, demonstrable care quality
- ✓ Person-centered care and rights
- ✓ Reduced cost by building on the 9001 structure

FREQUENTLY ASKED QUESTIONS

Is it mandatory for nursing homes?

Not always, but it is increasingly required in public tender specifications for places.

Does it cover day-care centers?

Yes, the standard covers both residential and day-care centers.

Why does it build on 9001?

It shares the quality management structure, onto which it adds the specific care requirements.
